

## Our Company

We provide tailored branding solutions to the global apparel market, working with companies of all sizes from various sectors. Our services include bespoke made labels, trims and packaging to add value and help clients increase their brand presence.

We now have offices and agents in 8 locations around the world including the UK, Hong Kong, China, India, Bangladesh and Canada, allowing us to offer dedicated support in key locations to our global client base. Our production facilities are located in Southern China, where we have developed a network of factory partners enabling us offer specialist production across our full product range from professional, experienced factories.

## Responsibility Statement

We are committed to complying with laws and regulations and acting in accordance with commonly accepted best practices in the locations where we operate.

We do not support or participate in human trafficking and forced labour and have a zero-tolerance approach. We look to develop relationships with partner factories who hold similar values and require them to have procedures in place to ensure they do not take part in any modern slavery.

All our supplier partners are subjected to an internally conducted supplier assessment which is based on the SMETA methodology, covering all ethical issues. Areas included in the assessment are working conditions, wages, working hours, child labour and discrimination. These supplier assessments are repeated at regular intervals so that we can maintain focus on this important issue.
